The following list contains the classification decisions (other than those subject to a reservation) taken by the Harmonized System Committee (**49th Session – March 2012**) on specific products, together with their related Harmonized System code numbers and, in certain cases, the classification rationale.

Advice

Parties seeking to import or export merchandise covered by a decision are advised to verify the implementation of the decision by the importing or exporting country, as the case may be.

No	Product description	Classification	HS codes considered	Classification Rationale
1.	Mouse pads.	Classification according to their constituent material	84.73	
2.	Halva (sugar confectionary) obtained by mixing ground sesame seeds (52 %) with honey (48 %), put up for retail sale in the form of a paste, in containers of 75 g.	1704.90	17.04, 19.01 and 20.08	GIRs 1 and 6
3.	Certain INN products. (See “Classification of certain INN products” at the end of this publication.)	Chapters 29, 30 and 39		
4.	Certain INN products. (See “INN List 104” at the end of this publication.)	Chapters 17, 28, 29, 30 and 39		
5.	Certain INN products. (See “INN List 105” at the end of this publication.)	Chapters 28, 29, 30, 35 and 39		
6.	Lunacalcipol (INN List 102).	2930.90		
7.	Orlistat (INN).	2932.20

8.	Narlaprevir (INN List 102).	2933.99		
9.	Ulimorelin (INN List 103).	2934.99		
10.	Pegdinetanib (INN List 103).	3002.10		
11.	Preparation in the form of pills, consisting of plant extracts (187.5 mg of dried ethanolic extract of valerian root (5.3-6.6:1) and 45.0 mg of dried aqueous extract of hop cones (5.5-6.5:1)), 67.5 mg of maltodextrose, colouring additives and excipients. According to the label, the product is recommended to be used as a remedy against agitation (two to four pills daily) or sleep disorders (one pill daily). The preparation is put up for retail sale in a box containing 60 pills.	3004.90	21.06 and 30.04	GRIs 1 and 6
12.	Mosquito nets: warp-knit, made-up articles consisting of polyester multifilaments (100%), in various shapes and sizes, impregnated or coated with an insecticide in the form of deltamethrin (55 mg/m²).	6304.91	38.08 and 63.04	GIRs 1, 3 (b) and 6
13.	A split-system air conditioning machine consisting of : (i) an indoor unit comprising a heat exchanger and a motor driven fan contained in a single housing designed to be suspended from the ceiling; and (ii) an outdoor unit comprising a refrigerant type compressor and condenser with motorized fan in a single housing. Both units are designed to be connected to each other by	8415.10		GIRs 1 and 6

	electrical wiring and copper tubing.			
14.	A dissolution bath that includes 7 stirrer stations conforming to the provisions set down in the U.S. Pharmacopeia for USP Methods 1 (Basket), 2 (Paddle), 5 (Paddle over Disc) and 6 (Cylinder) used for dissolution of tablets or capsules and drug release of transdermal patches in a specially prepared dissolution medium within the predetermined length of time and under the preset operation parameters. It also includes an electrical heating coil that heats the dissolution solution in accordance with a pre-determined temperature. A built-in control panel allows setting up of the dissolution bath's operating conditions required for the particular dissolution or drug release test, such as temperature (20-60 degrees Celsius), speed of stirrers (30-250 rpm), testing method, tablet feeding, sampling time, etc. The dissolution bath, which does not carry out any type of analysis, can be connected to an apparatus such as a spectrophotometer for the subsequent determination of the amount of released active ingredient(s) in the dissolution medium, and to an automatic data processing machine.	8419.89	84.19 and 84.79	GRIs 1 and 6
15.	Certain machines commercially referred to as "tablet computers", featuring Wi-Fi and Bluetooth connectivity only.	8471.30		GIRs 1 (Note 3 to Section XVI and Note 5 (A) to Chapter 84) and 6
16.	"Mini" or "Micro" solid-state, non-volatile data storage devices (known as "flash memory cards" or "flash electronic storage cards"), having a storage capacity up to 2 GB, consisting of a non-conductive BT (Bismaleimide-Triazine	8523.51		GIRs 1 (Note 4 (a) to Chapter 85) and 6

	resin) substrate (printed circuit board) with conductive copper traces and a contact pad for connection to the host interfaces, into which are mounted (i) one flash memory (.FLASH E^2PROM.) in the form of an integrated circuit, (ii) a microcontroller in the form of an integrated circuit and (iii) passive elements. The dimensions of those devices are 21.5 mm x 20 mm x 1.4 mm ("mini") or 15 mm x 11 mm x 1.0 mm ("micro"). Data can be stored onto and read from these cards once they have been inserted in a particular appliance, such as printers, mobile phones, audio recording apparatus, digital cameras, data collection terminals and video game consoles. The data can also be transferred to an automatic data processing machine. These cards use power from the appliances to which they are connected and require no battery.			
17.	Three-wheeled vehicle, enclosed for the delivery of beverages and incorporating a driver's cab, propelled by a four-stroke, single-cylinder, **compression** ignition engine with a cylinder capacity of 395 cm^3. The load capacity is 500 kg. The front wheel is steered using handlebars. The vehicle has a differential, a four-speed gear box with reverse gear, a transmission shaft and drum brakes. The front wheel suspension consists of shock-absorbers and spiral springs, and the rear wheel suspension consists of leaf springs assisted by two telescopic shock-absorbers.	8704.21	87.04 and 87.11	GIRs 1 and 6

No	Product description	Classification	HS codes considered	Classification Rationale
18.	Three-wheeled vehicle with cargo box, propelled by a four-stroke, single-cylinder, spark ignition engine with a cylinder capacity of 175 cm^3. It is 2900 mm long, 1050 mm wide and 1250 mm high. The dimensions of the cargo box (LxWxH) are 1250x1000x280 mm. The vehicle has a net weight of 260 kg and a payload capacity of 230kg. The front wheel is steered using handlebars. The vehicle has a differential, a four-speed gear box with reverse gear, a transmission shaft and drum brakes. The brakes are operated by the handlebars and by a pedal. The front wheel has cylinder suspension, and the rear wheels have leaf-spring suspension.	8704.31	87.04 and 87.11	GIRs 1 and 6
19.	Three-wheeled vehicle, fitted with bodywork for the delivery of beverages and incorporating a driver's cab, constructed and fitted out in the manner of a motor vehicle cab. The vehicle is propelled by a four-stroke, single-cylinder, spark ignition engine with an engine displacement of 249 ml. It is 3380 mm long, 1435 mm wide and 1545 mm high. The dimensions of the cargo box (LxWxH) are 1530 x 1412 x 300 mm. The vehicle is steered using a steering wheel. It has a differential, a four-speed gear box with reverse gear and an electric starter.	8704.31	87.04 and 87.11	GIRs 1 and 6
20.	Total body cryotherapy chamber consisting of the following separate basic parts, which are presented together and unassembled : 1) Cryotherapy Chamber consisting of a Pre-Chamber (minus 60 °C) and a Therapy Chamber (approximately minus 110 °C) which are connected by a door.	9018.90	84.18 and 90.18	GIRs 1 (Note 3 to Chapter 90 and Note 4 to Section XVI) and 6

No	Product description	Classification	HS codes considered	Classification Rationale
	The Cryotherapy Chamber is made up of insulating elements. The external dimensions of the Chamber are 2400 mm (W) x 4200 mm (L) x 2550 mm (H). The internal dimensions of the Pre-Chamber are 1600 mm (W) x 2250 mm (H) x 1760 mm (D) and of the Therapy Chamber are 2100 mm (W) x 2250 mm (H) x 1700 mm (D). Both the Pre-Chamber and the Therapy Chamber are equipped with a special water-resistant carpet on the floor, entrance doors, windows, lighting, load speakers, emergency signal switches, pressure balance elements, and with evaporators. The evaporators have built-in three fans enabling the air circulation and integrated defrost-heating device. The Therapy Chamber is further equipped with a microphone and a video monitoring system. 2) Refrigeration machine. The refrigerating machine is a 3-level cascade system installed in closed machine housing, and it is air cooled. The machine is placed in another room than the Cryotherapy Chamber, and together with the evaporator, it creates temperature in the Chamber up to -110 °C. The dimensions of the refrigerating machine are 1600 mm (W) x 1700 mm (H) x 800 mm (D). 3) Switching cabinet. The switching cabinet incorporates electric switching system which is necessary for operating the Total Body Cryotherapy Chamber as a whole. The cabinet is placed in the same room as the above mentioned refrigerating machine. Its dimensions are 1000 mm (W) x 2000 mm (H) x 500 mm (D).

	4) Control desk. The control desk includes industry PC embedded nano-servers, a 15'' TFT display with touch screen, an inter phone, two loudspeakers, a microphone, a CD player and an emergency stop switch. All these components are built in the same housing. Over the touch screen, an operator can control all functions, adjustments and machines values. The desk has dimensions of 600 mm (W) x 980 mm (H) x 400 mm (D) and is placed in the same room as the Cryotherapic Chamber. 5) Condenser. The condenser consists of a heat exchanger with crossing twin ribs and ventilators with three-phase motors. The condenser is located outside the building where the Cryotherapy Chamber is established and it is involved in the creation of the low temperature in the chamber. All above-mentioned units are connected by copper tubes, through which the coolant circulates, and by electrical cable.
