### For the Member-States authorities:

- Quality improvement and reduction of delivery time for public services and public function realization;
- Risk management improvement;
- Budget spending reduction of the Member States for the provision of public services and implementation of public functions;
- Quality improvement of public services;
- Simplified administrative procedures and efficiency improvement.

### For participants of foreign economic activity:

- Simplifying information interaction technology with state authorities regulating foreign economic activity;
- Optimizing resources, including labour resources, in foreign economic activity;
- Improving transparency and predictability of business processes related to foreign economic activity.
Thank you for your attention!
