**Anti-Corruption  
& Integrity Promotion  
Programme for Customs**

The Anti-Corruption and Integrity Promotion (A-CIP) Programme responds to the recognised high costs of corruption in customs. It aims at improving the business environment for cross-border trade in selected WCO member countries.

WORLD CUSTOMS ORGANIZATION

# A-CIP

## Anti-Corruption & Integrity Promotion Programme for Customs

The A-CIP Programme supports countries in implementing new measures to combat corruption and promote integrity in accordance with the ten areas of the Revised Arusha Declaration.

Several activities will be delivered under two components:

- **Bilateral component:** multi-annual action plans are developed with participating administrations, including clear benchmarks and performance measurement criteria.

- **Multilateral component:** an enabling environment will allow WCO Members to implement A-CIP measures by leveraging other regional and international initiatives.

The A-CIP Programme complements other WCO activities. One of them is the WCO Mercator Programme, which creates roadmaps and offers a results-based approach to help customs administrations implement relevant national commitments under the World Trade Organization's Trade Facilitation Agreement (WTO TFA). This work supports transparency and predictability, promoting integrity and closing opportunities for corruption.
