

## National Superintendency of Customs and Tax Administration - PERU

3 June 2020

### Flexibilities concerning the AEO Programme

Peru Customs has implemented two mechanisms to manage certification process in this emergency context:

- **AEO certification applications:** Peru Customs continues to evaluate AEO applications by analyzing documents submitted by companies and arranging virtual meetings to clarify or explain procedures or any issue that could arise. On-site validations are suspended and AEO certification is not issued until physical validation can be done.
- **Revalidation for AEO companies:** Once a company is certified, Peru Customs conducts an annual evaluation which includes on-site visits. Considering the current emergency scenario, the evaluation is only documentary and we are replacing on-site visit with virtual meetings which may include virtual visits (maybe using a mobile phone of the company).
