

# National Revenue Administration of Poland

**23 march 2020**

Recently, almost 5000 liters of confiscated alcohol have been donated by the National Revenue Administration of Poland (KAS) to be used to produce disinfectants to support the fight against the Coronavirus (COVID-19).

In face of the threat of COVID-19 and thanks to the early measures undertaken by the National Revenue Administration together with the legal system in Poland, the alcohol originally intended to be destroyed after being confiscated as part of criminal investigations, was donated for the preparation of disinfectants for objects, surfaces, rooms and means of transport.

The confiscated alcohol was donated to hospitals, the state fire service, emergency services and health care facilities.

The Silesian Revenue Administration Regional Office donated almost 1000 liters of contaminated and uncontaminated alcohol to the voivodship sanitary epidemiological station in Katowice.

The Revenue Administration Regional Office in Olsztyn donated 1500 liters of spirits to two hospitals. Previously, 1000 liters of alcohol was donated to the state fire service in Olsztyn.

In the coming days KAS will transfer another 3000 liters of alcohol to hospitals and 5000 liters of spirits to the state fire service.
