*DRAFT, Action Plan to implement the provisions of the "B" and "C" of WTO TFA in Kazakhstan
IV. Coordinated Border Management

1. When conducting customs control with respect to goods transported across the customs border of the Eurasian Economic Union and subject to control by other state bodies of the Republic of Kazakhstan that exercise state control (supervision) at the customs border of the Eurasian Economic Union, the customs authorities ensure overall coordination of the actions of other state bodies of the Republic of Kazakhstan and simultaneous joint control in the manner determined by the joint act.

2. It is prohibited to interfere with the activities of customs authorities, except the cases specified by the legislative acts of the Republic of Kazakhstan.

3. In order to accelerate the state control (supervision) during the movement of goods across the customs border of the Eurasian Economic Union, customs inspection may be conducted with the participation of other state bodies of the Republic of Kazakhstan exercising state control (supervision) at the customs border of the Eurasian Economic Union. Thus the certificate of customs inspection is made.

(Article 402. Interaction between the customs authorities and other state bodies of the Republic of Kazakhstan exercising state control (supervision) at the customs border of the Eurasian Economic Union, Code of the Republic of Kazakhstan On Customs Regulation in the Republic of Kazakhstan)

(Article 403. The interaction of customs authorities with other government bodies of the Republic of Kazakhstan, Code of the Republic of Kazakhstan On Customs Regulation in the Republic of Kazakhstan)
IV. Coordinated Border Management

Customs in Kazakhstan is responsible for:

- Radiation control;
- Export control;
- State veterinary sanitary control;
- State quarantine phytosanitary control;
- Quarantine control;
- Transport control;
- Currency control.
IV. Coordinated Border Management

By coordinating the activities, the border authorities take measures to minimize the time for conducting control and prevent unreasonable delay in the time allotted for control operations.

In order to improve the efficiency of customs control, and to identify the facts of offenses (crimes) in the field of customs, to reduce the time of customs inspection of goods and vehicles moved across the customs border of the Eurasian Economic Union, X-Ray inspection complexes are used.

At checkpoints equipped with X-Ray inspection complexes used by customs control units, border control units recognize the results of inspections with their use. In some cases, inspection of vehicles, cargo and goods is carried out jointly by border and customs control units.

Moreover, decisions of customs authorities taken during customs operations and the results of customs control, executed in the prescribed manner, are mutually recognized in the member states of the Eurasian Economic Union and have equal legal force in the customs territory of the Eurasian Economic Union.
“Life is really simple, but we insist on making it complicated.”~ Confucius
