“Sakura Blossom: It might take time, but your career will bloom anyway”

### ***Caption***

The flowering of the Japanese Sakura cherry blossom is an event not to be missed and is a wonderful time of year to visit Japan. This photograph evokes memories of the time we spent as part of the CDP, which, for many of us, will be remembered as one of the best periods in our professional and personal lives.

The Sakura is an enduring symbol of Japan; the country that, through the CCF-Japan, provided us with a unique development opportunity. With the right conditions and a favourable environment, the Sakura will continue to bloom and flourish. Similarly, with the support provided to us by the WCO, our professional qualities have been enhanced and our careers will surely thrive.
