

SURVEY ON FREE TRADE AGREEMENTS

INTRODUCTION

This publication provides information about free trade agreements (hereinafter referred to as "FTAs") and their importance vis-à-vis the Harmonized System. This publication provides updated information on FTAs and Customs Unions currently in force in addition to the "SURVEY ON FREE TRADE AGREEMENTS" published as of February 2009 (based on WTO information sources and only included the regional trade agreements for which the WTO was notified as being Free Trade Agreements or Customs Unions and in force as of 20 January 2009) and the share of imports from FTA and Customs Union countries in world trade. For the purposes of this survey, countries mean members of the FTAs and Customs Unions, including territorial entities, for which statistical data are maintained and provided internationally on a separate and independent basis. For convenience of analysis, "shares of imports from FTA and Customs Union countries" were computed based on trade statistics from the "Direction of Trade Statistics in 2008" published by the International Monetary Fund. The survey was limited to trade in goods only.

Annex I to this publication provides some information on 20 agreements, in addition to the "SURVEY ON FREE TRADE AGREEMENTS" published as of February 2009, such as the number of members of the agreements, names of member countries, date of entry into force and types of agreements. This survey is based on WTO information sources (www.wto.org), and it only includes the regional trade agreements for which the WTO was notified, as being Free Trade Agreements or Customs unions and in force as of 20 January 2009.

Annex II reveals trade information for 165 countries that had FTAs and Customs Unions as of 31 December 2008. About 44% of the world's total imports (US\$ 16,736.7 billion) occurred among FTA and Customs Union member countries. Almost half (45%) of total imports (US\$ 16,279.3 billion) occurred among FTA and Customs Union member countries. In the case of European countries, over 60% of the European countries' total imports (US\$ 7,291.2 billion) came from FTA and Customs Union member countries.

Annex III shows the distribution of country groups with different levels of shares of imports from FTA and Customs Union member countries in terms of total import value in the year 2008. In the case of 33 countries, more than 70% of the total import value came from FTA and Customs Union member countries. For 61 countries, over 50% of total imports came from FTA and Customs Union member countries.
