

<b>WCO Website back-end systems in brief</b>	
Windchill	Meeting documents are managed, stored, published by the moderators (secretaries) through this application. The document tables are automatically copied onto the members area of the website
Member database	Login and passwords, monitoring of the member accesses are managed through an in-house application that links to the member database
The Harmonized System Commodity Database – HS Online	This tool allows the access to the Database of HS. It is an online tool developed externally. It is with payment through the bookshop.
WCO Databank on Advanced Technology	It is an advanced search engine for customs products. It connects to the Databank database. It is only a link on both public and member areas.
Bookshop	It is developed externally. We only use external links on WCO website. This tool is not managed internally. (external server) The login and passwords are synchronized for free WCO member access
CEN (Customs Enforcement Network), CENcomm, Ncen	CEN is a website independent from WCO web management. It has its own member database, server and it is managed by Dreamweaver. CENcomm and Ncen are applications interconnected to CEN. We use links on WCO website
WCO Forum	It is an “out of the shelf” tool which is placed under the web server but has an independent management system.
Online Customs Valuation Compendium	This tool allows the access to the texts of the WTO Valuation Agreement, as well as to the technical decisions taken by the Committee. It is an online tool developed externally. It is with payment through the bookshop.
E-learning	This is an interactive multimedia training tool for WCO Members. It is an online tool developed externally but maintained internally. It has its own member database and server. It is by registration. We use links on WCO website.
