1 Advanced Electronic Information package (AEI DIP) based on SAFE Framework FoS

1.1 Introduction

The following tables define the mapping between the SAFE data elements and the WCO Data Model 3.6.0. This mapping is presented in the form of a Derived Information Package based on the Declaration Base Information Package.

This table was built by volunteer members [US, RU, CA, EU (through MS), JP, KR, IL, NA, NG] by submitting their individual advance electronic information requirements and mapping these to the SAFE data elements. The resultant mappings are stored in the Derived Information Package in the form of usage notes which define how each element is used in these countries/regions.

The following abbreviations are used in the Usage table:
