### ARTICLE 10: FORMALITIES CONNECTED WITH IMPORTATION, EXPORTATION AND TRANSIT

#### 10.4 Single Window

Brazilian Single Window Portal is the main initiative to reduce bureaucracy and modernize Brazilian foreign trade. Combining the adoption of international standards and models with active participation of the several public and private actors in all phases of the projects, from modeling of processes to the review of applicable legislation, it seeks to ensure the adequacy of public foreign trade services to the needs of its users.

Focus in quick and progressive wins that add value to public and private sectors entities, several deliveries have already been carried out under the Program. As examples, the Single Export Declaration stands out, which reduced the number of documents required for processing an export by 75% and 60%, besides simplifying and digitizing procedures.

As next steps: Single Import Declaration, with parallel controls by Customs, Health and Agriculture agencies; and tax payment and compliance (which involves automatic calculation, exemption and payment identical as used for federal taxes on imports) for state tax (IVA) through the Centralized Payment of Foreign Trade.
