

## Thailand

### **ARTICLE 7: RELEASE AND CLEARANCE OF GOODS**

Time Release Study becomes one of the most important tools to measure the capacity of goods release procedures, especially in the customs formalities. WCO guideline is the basic tool to lead how the TRS should be planned and conducted.

Thai Customs specified TRS in the five-year Action Plan as the indicator of customs trade facilitation performance. Moreover, the other agencies, such as the Office of the National Economic and Social Development, requests Thai Customs to conduct TRS at Laem Chabang Port regularly, so they can use the result of the study as one among other indicators for the national logistic development.
